

Problem 1:

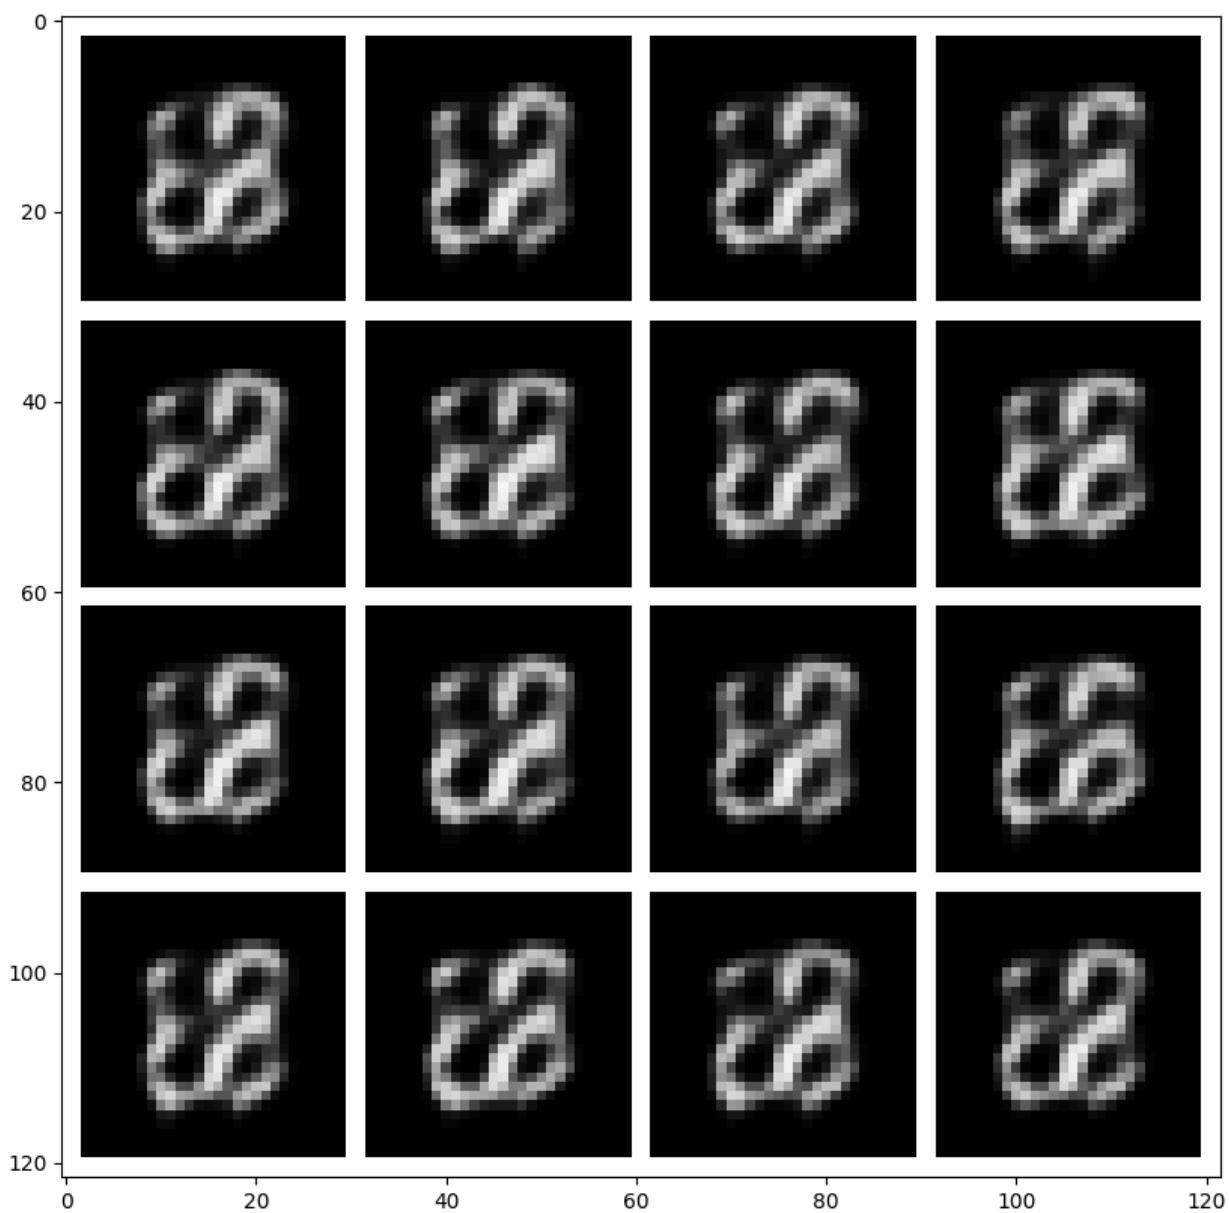

From cell 32 with Beta = 0.0 and epochs being 5, we get the result:

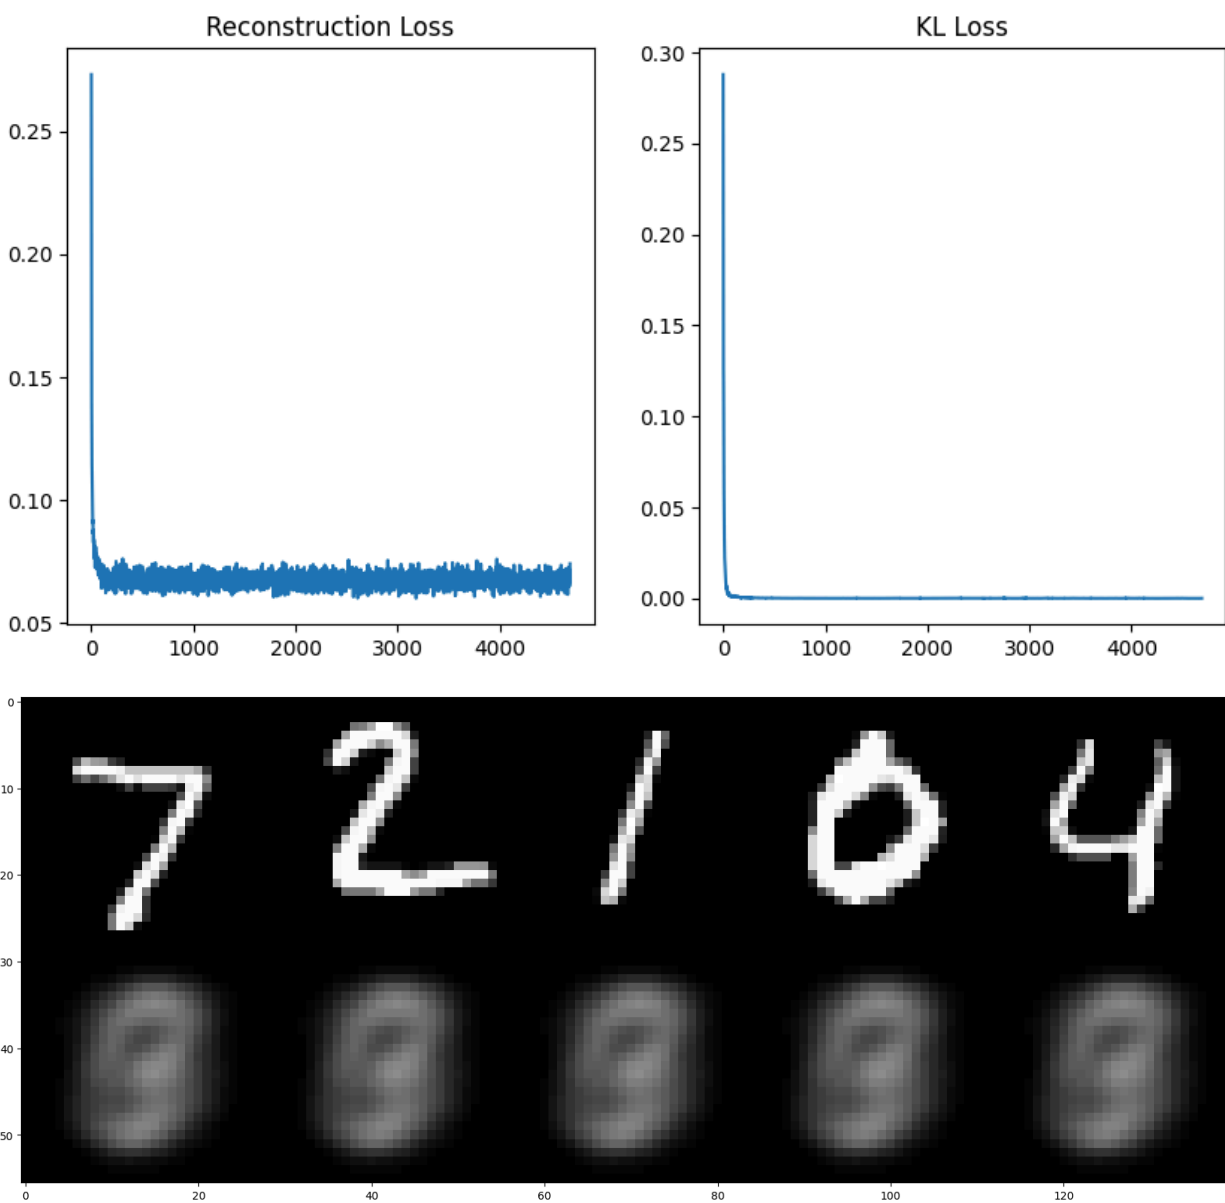

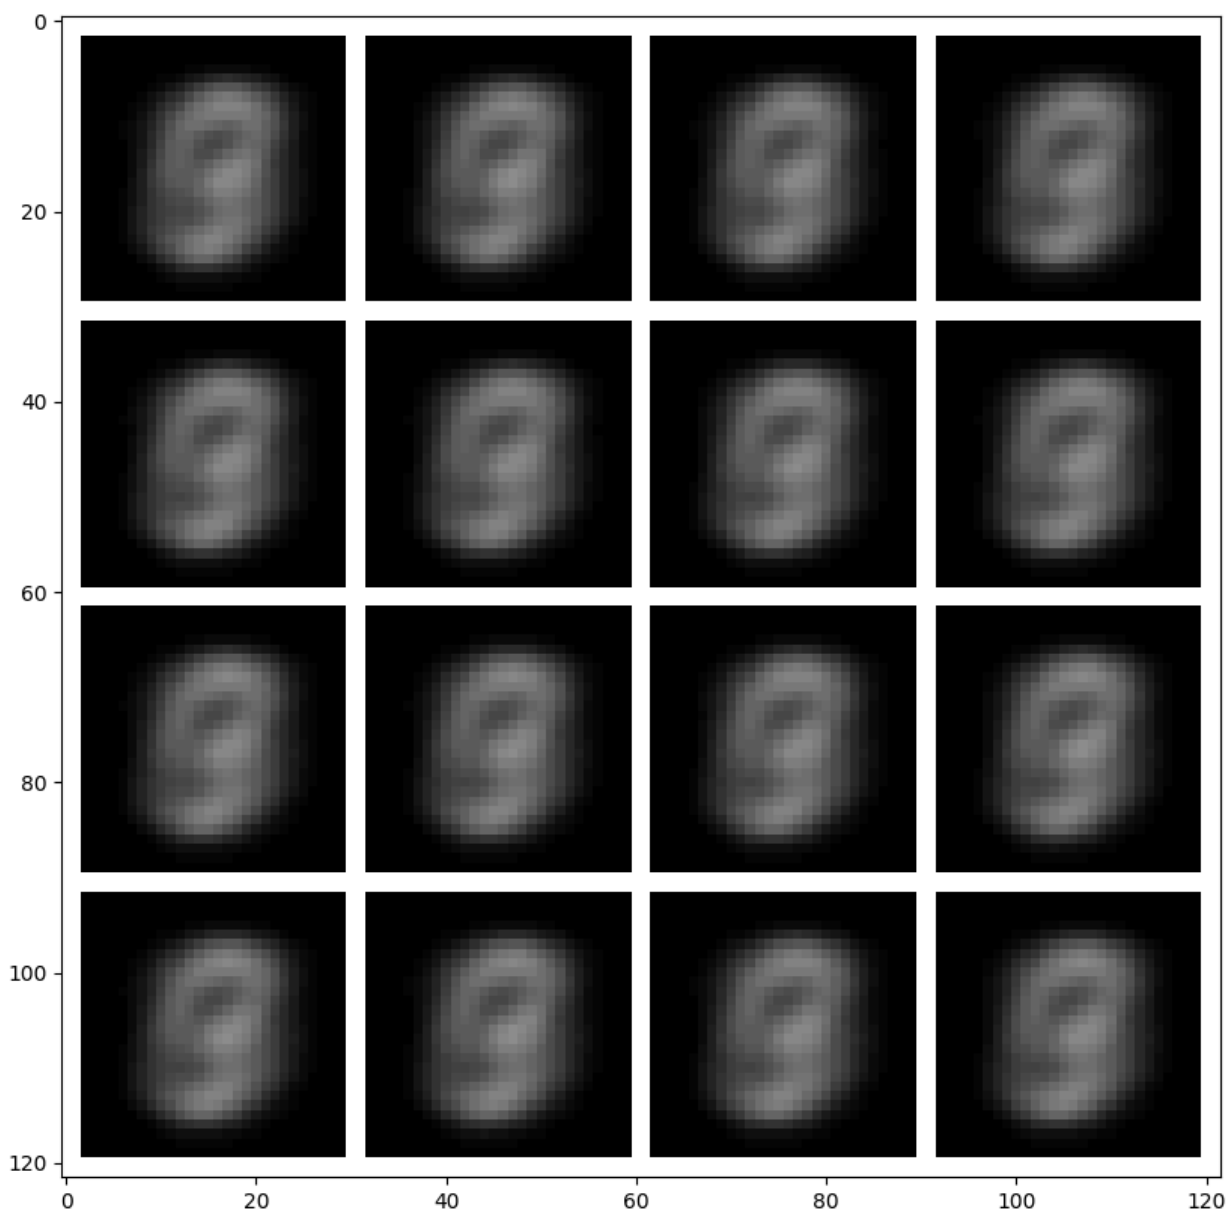

Now this is the reconstruction with $\beta = 10$ and epoch = 20.

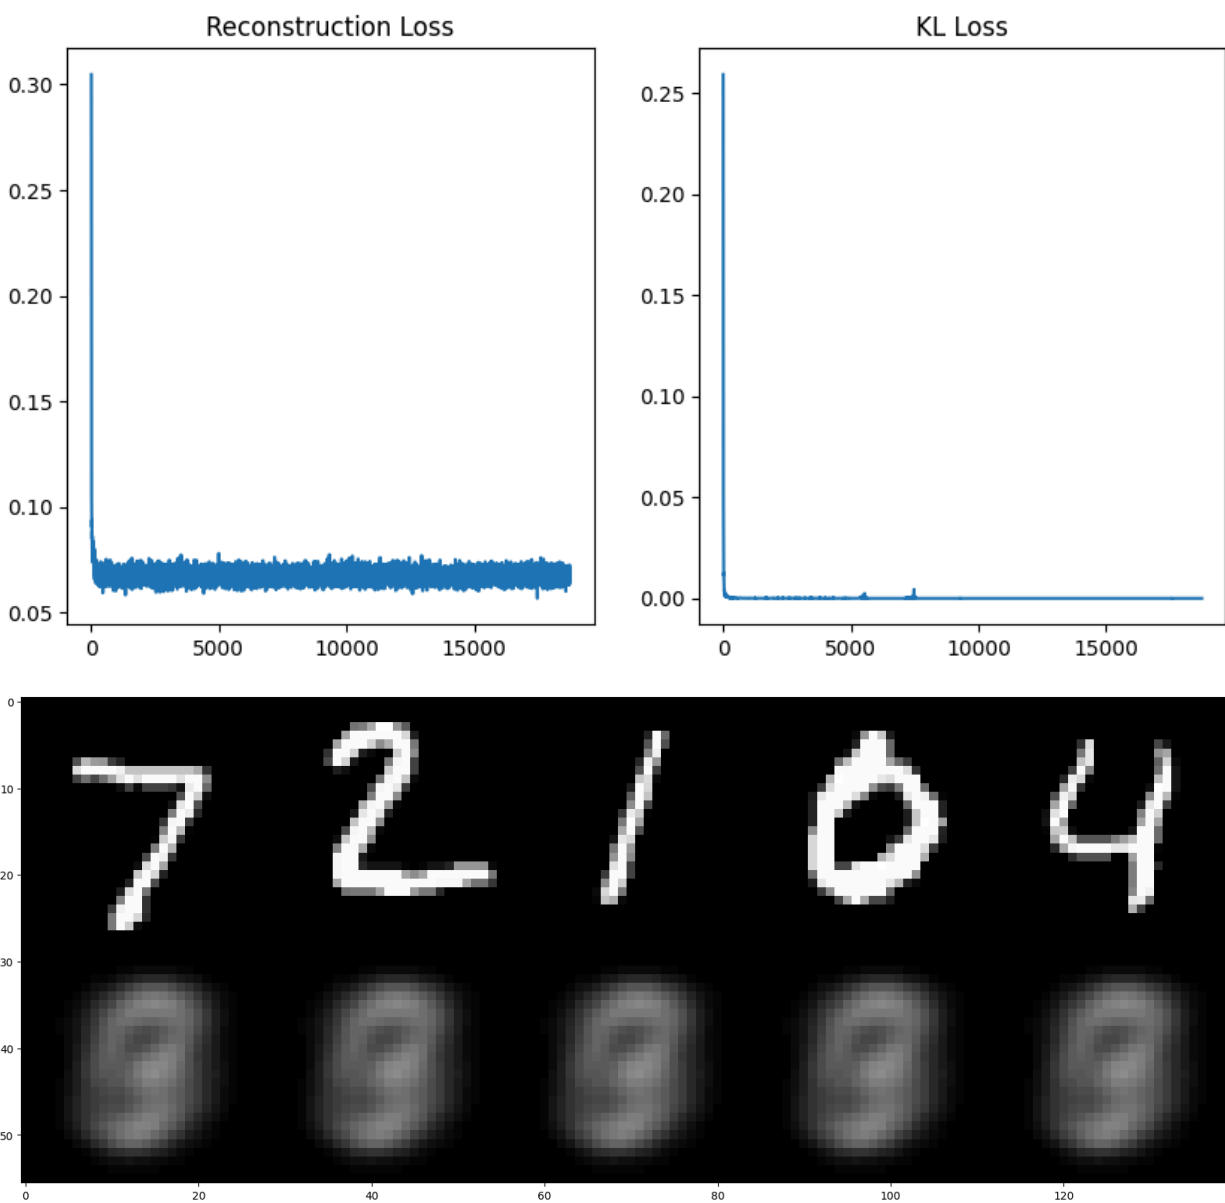

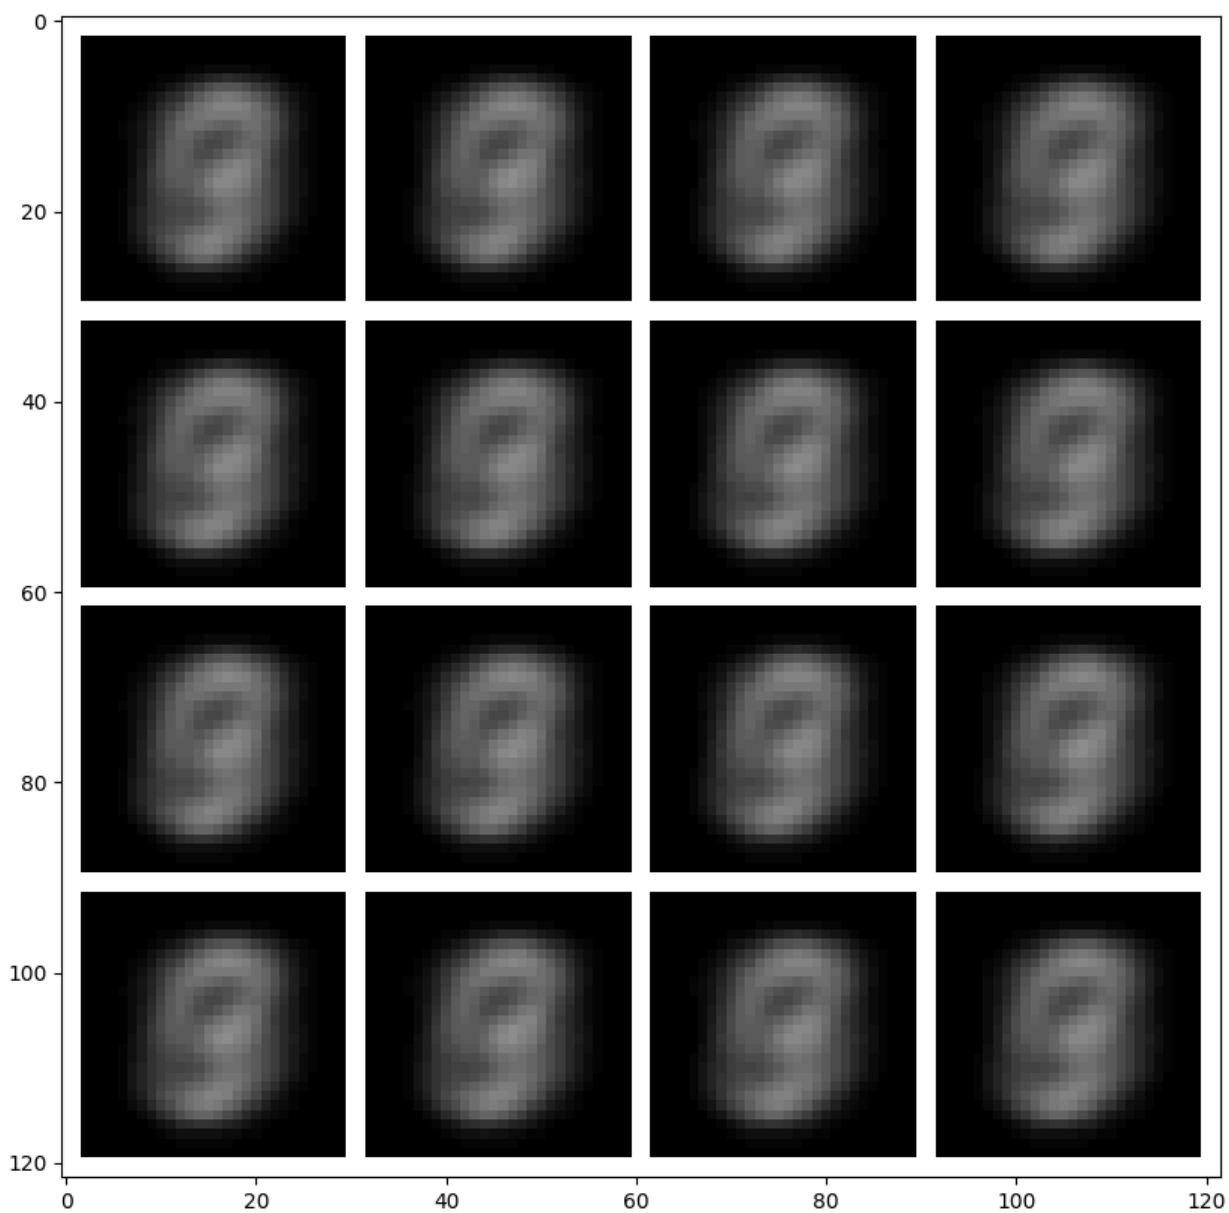

From cell 35 with Beta = 10.0 and epochs being 5, we get the result:

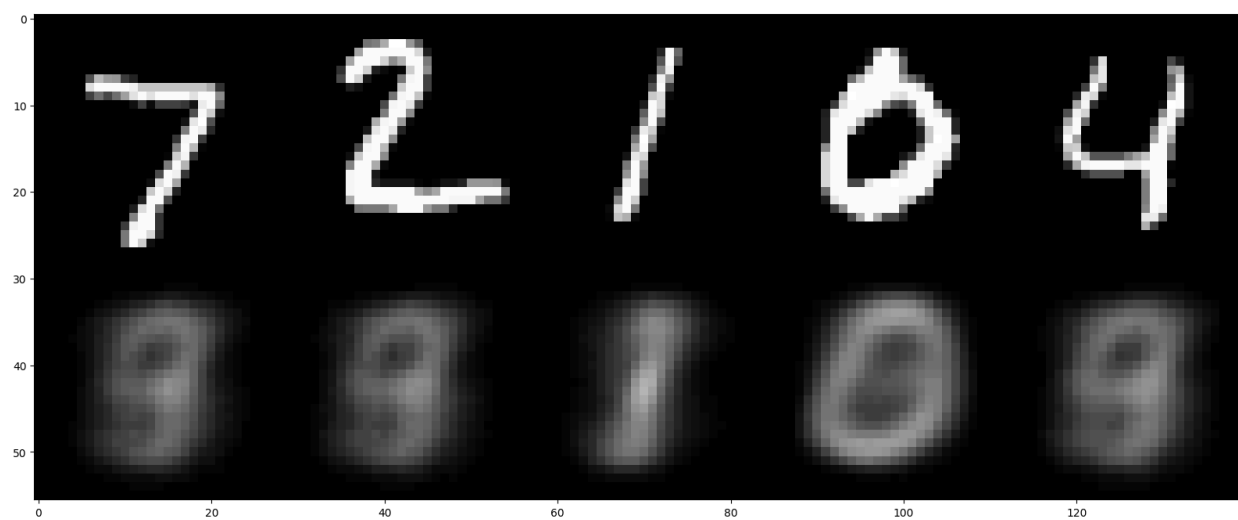

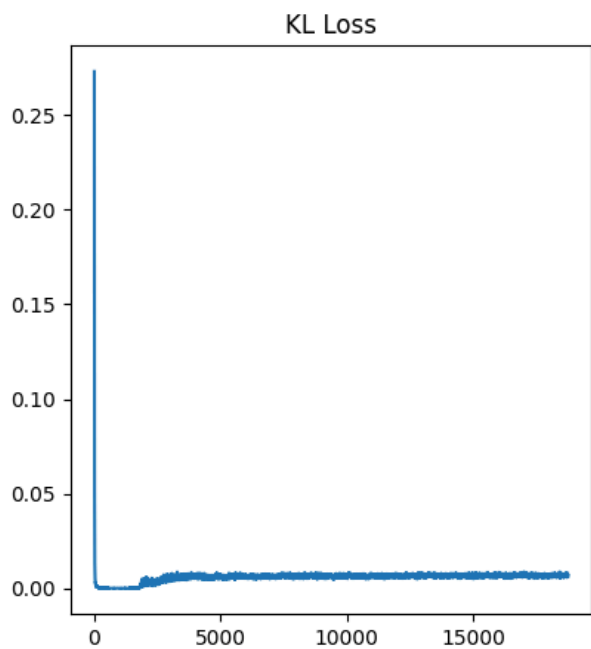

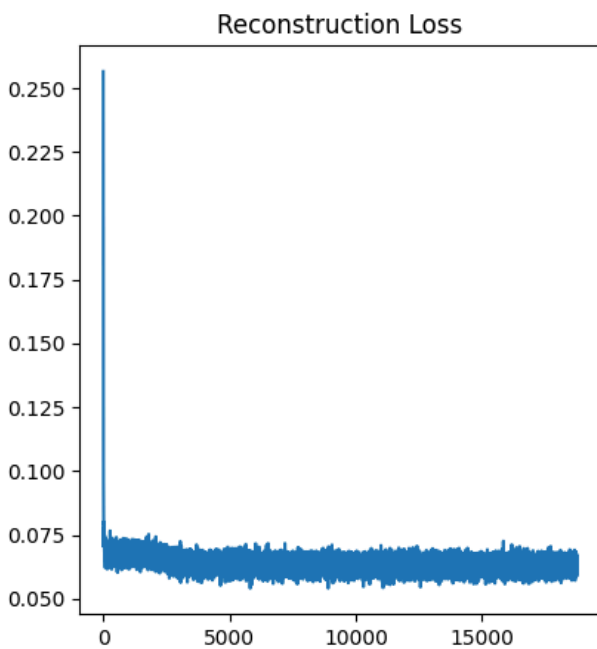

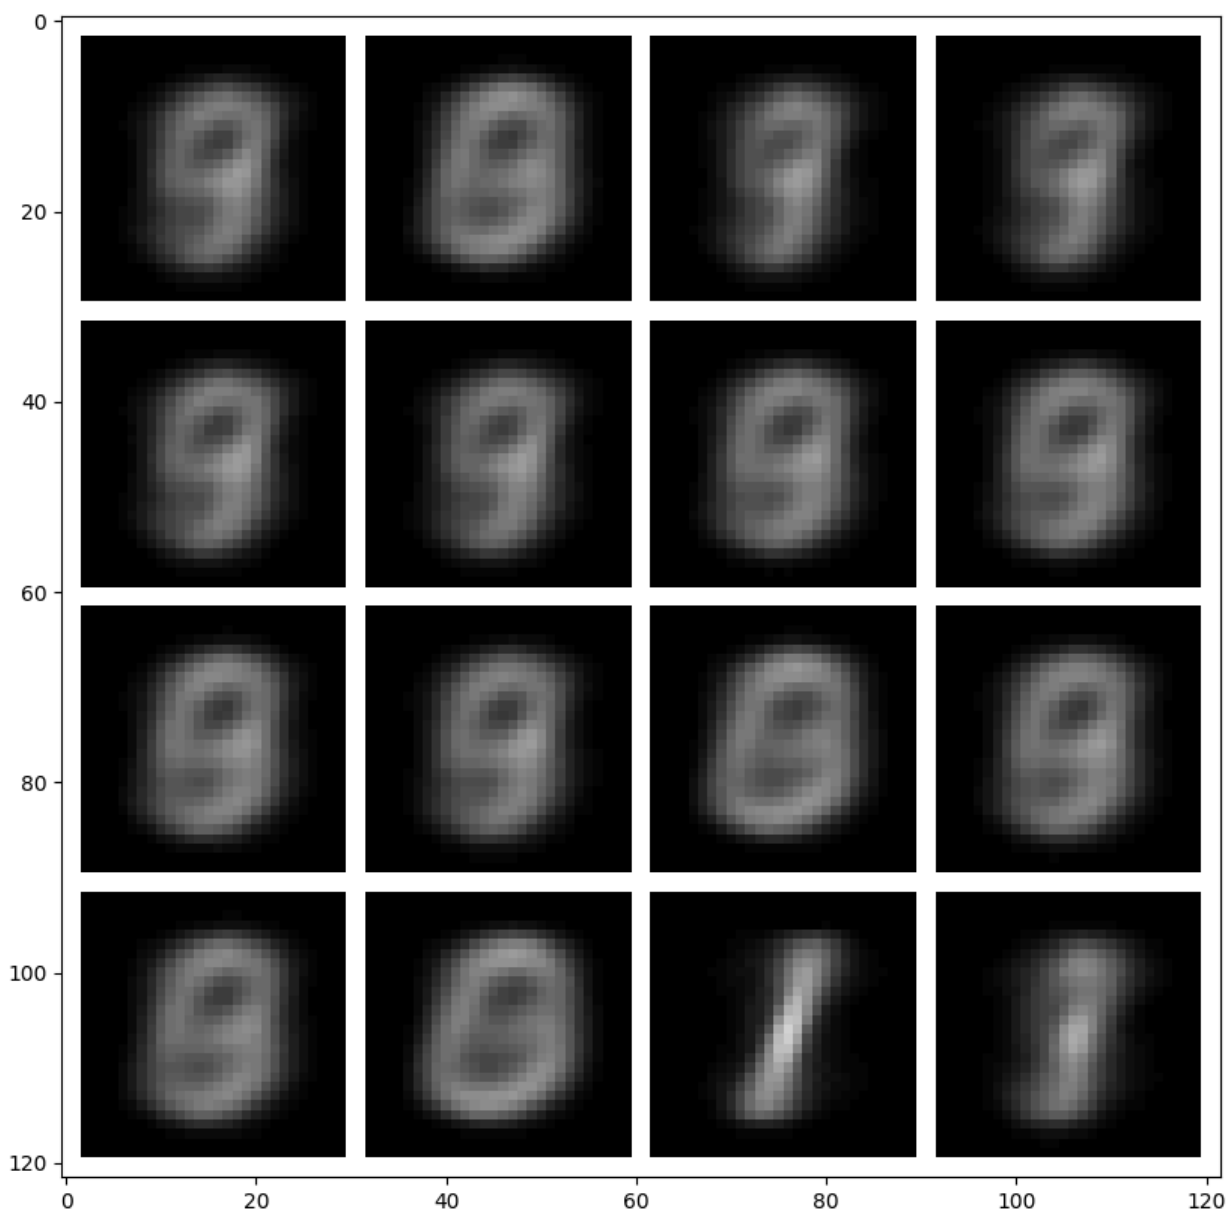

From cell 35 with Beta = 10.0 and epochs being 20, we get the result:

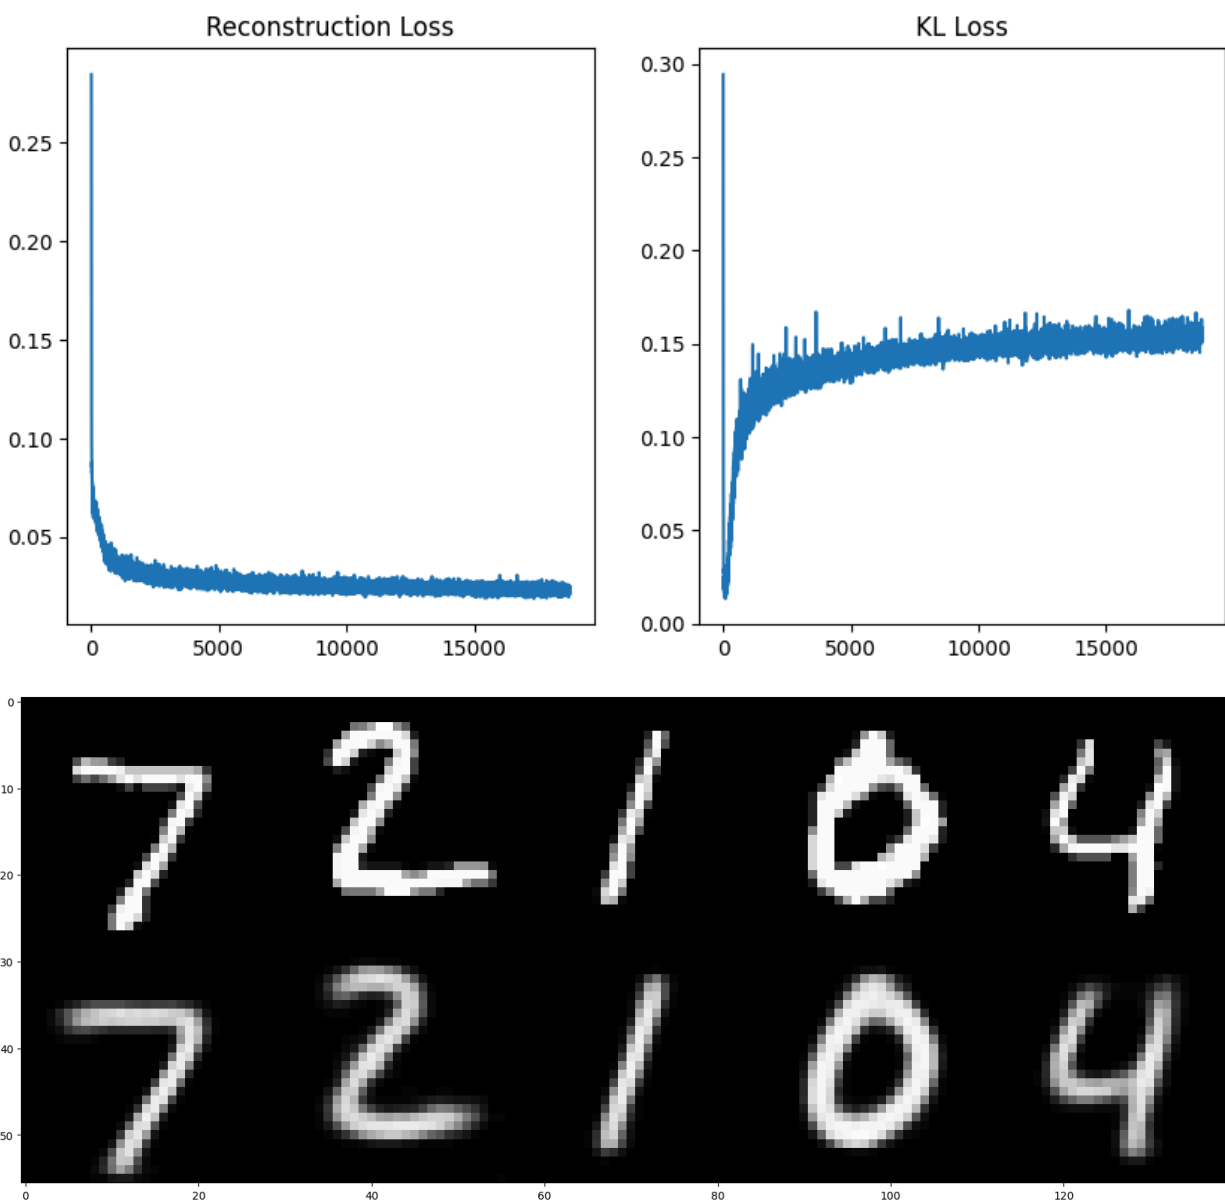

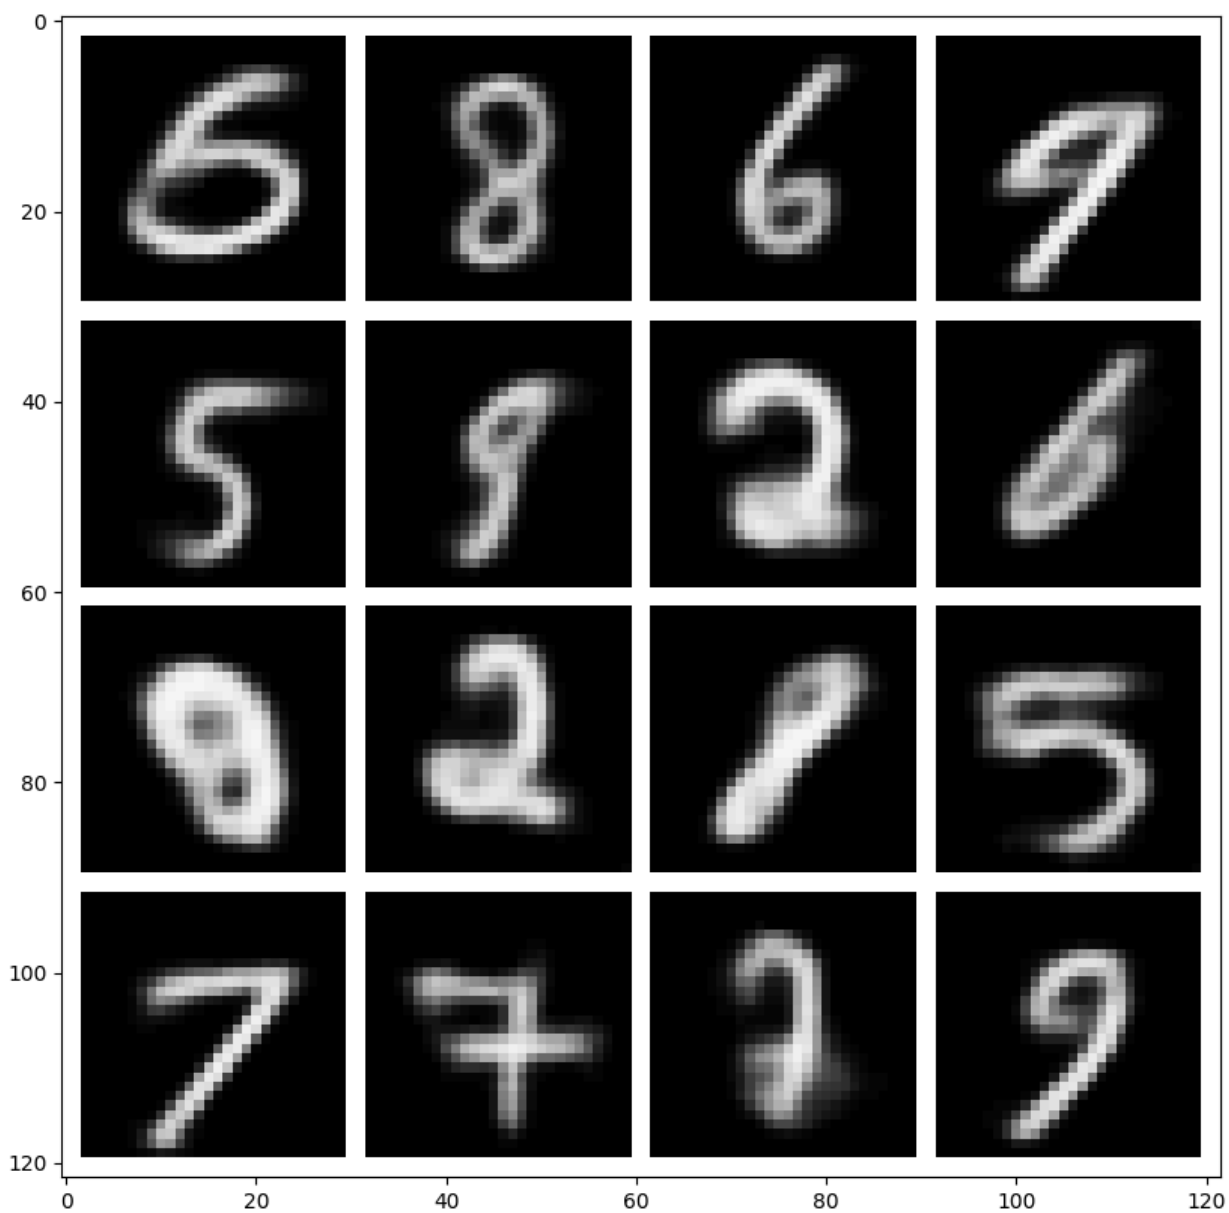

From cell 35 tuned with $\text{Beta} = 0.5$ and epochs being 20, we get the result:

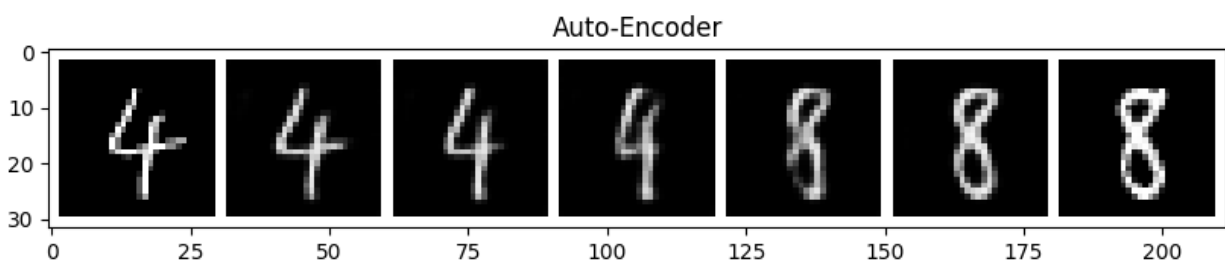

From cell 35 tuned with Beta = 0.1 and epochs being 20, we get the result:

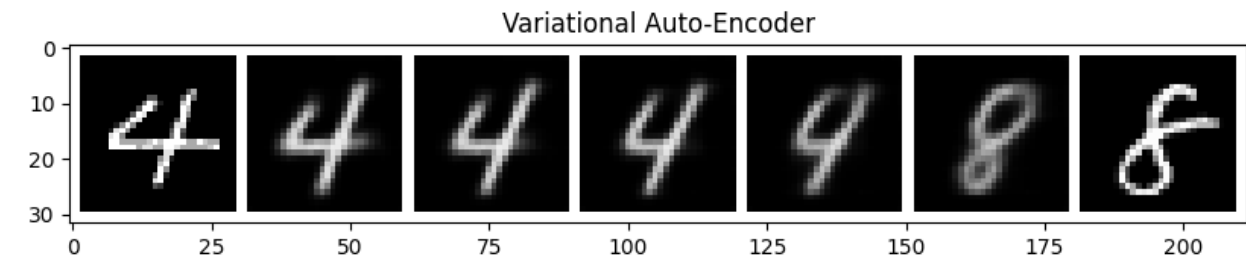

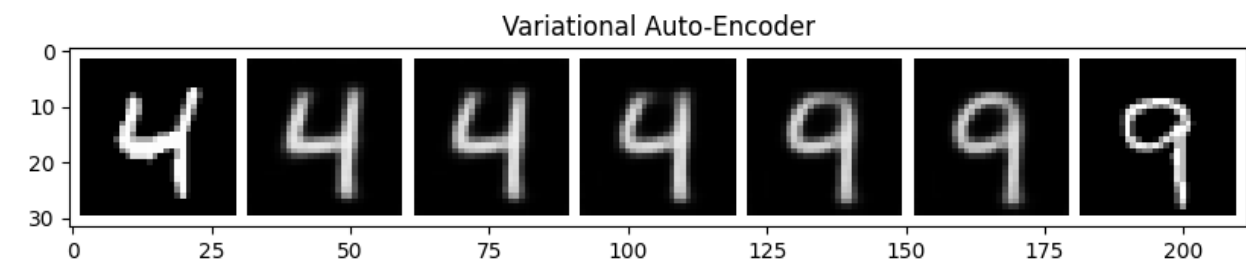

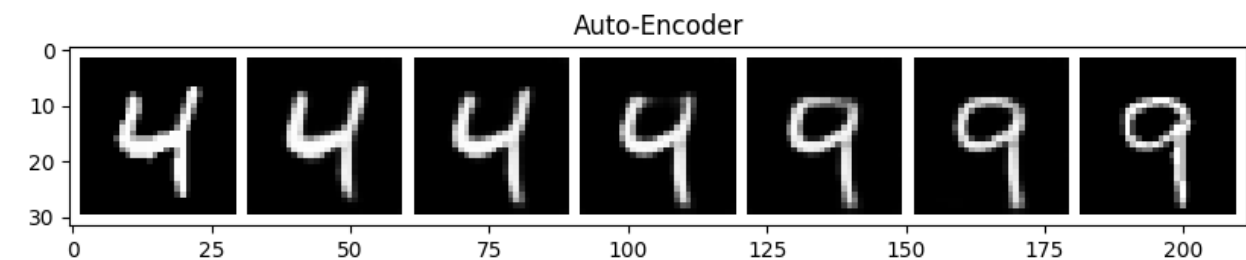

Problem 4.

```
START_LABEL = 4  
END_LABEL = 8
```

```
START_LABEL = 4  
END_LABEL = 9
```

```
START_LABEL = 1  
END_LABEL = 7
```
